Number 21

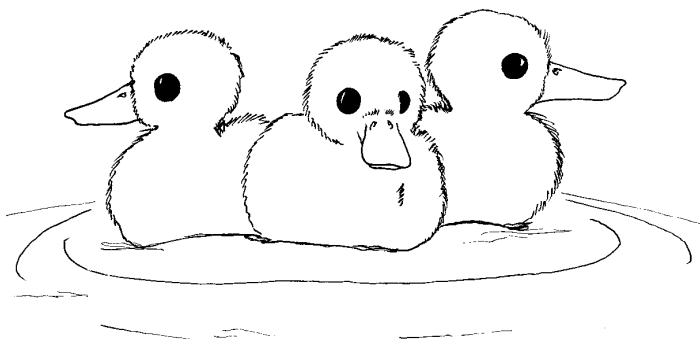

Young fish, called **fry**, must find their own food. This fry hatched from an egg and still has its yolk sac.

7

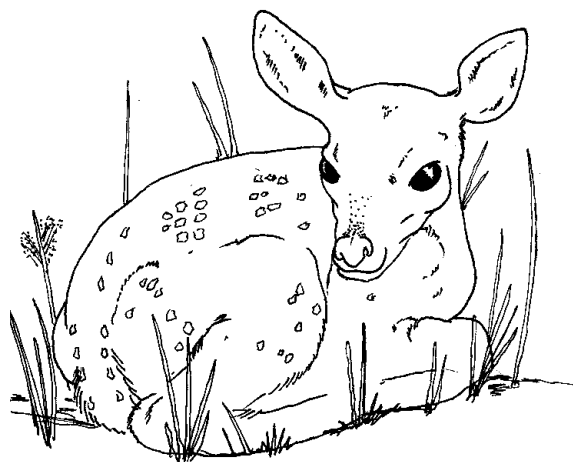

Baby Animals

by _____

Baby ducks are called **ducklings** and baby geese are **goslings**. They can swim with their mother soon after hatching.

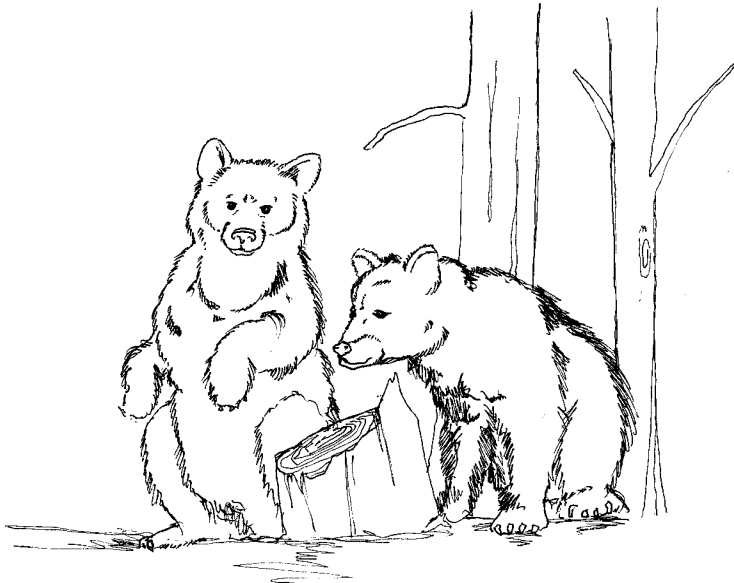

5

A young deer, called a **fawn**, can stand and run soon after birth. The spots on this fawn help it hide in the grass.

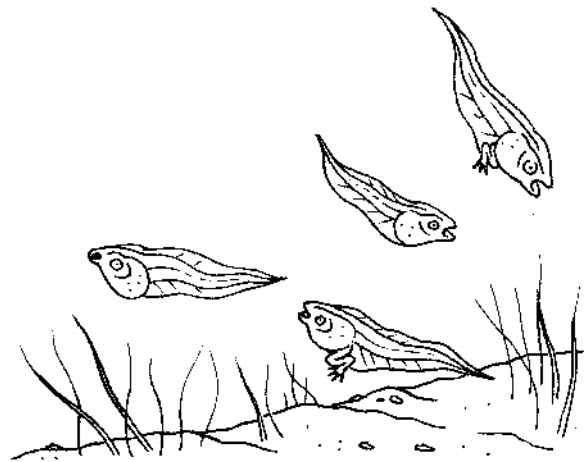

2

Directions: Write your name on the line on the cover page. Color the pictures. Cut along the dotted lines. Fold each strip in half so that you see one picture on each page. Make sure that the cover is on the front and the pages are in the correct order. Then, staple your booklet together.

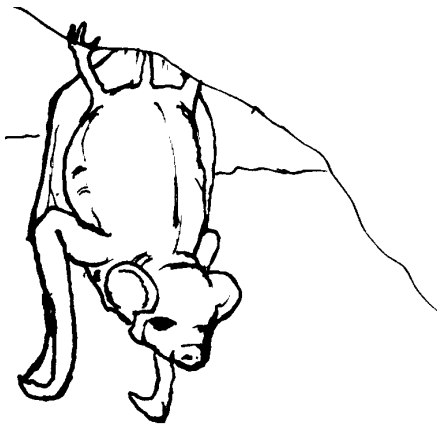

Young bears, called **cubs**, receive food and warmth from their mother. They stay with her for a year.

1

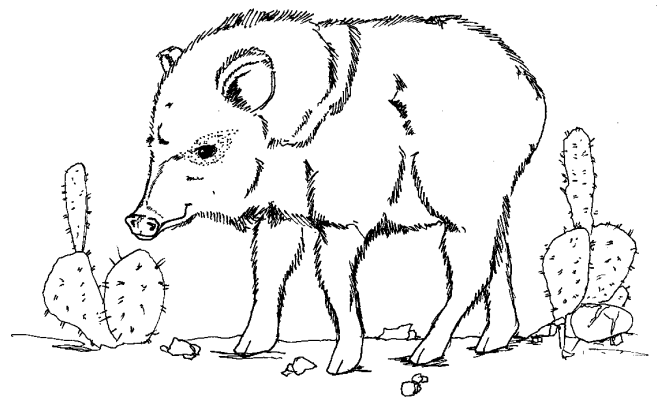

Young frogs and toads are called **tadpoles**. They may never see their parents and must find their own food.

6

A baby bat, called a **pup**, stays with its mother for a month or two until it can fly and find its own food.

3

A newborn javelina is reddish colored and is called a **red**. When it is a little older, it is called a **pigling**.
